

CLAIMS

I claim:

1. A simulated cigarette which is designed to help quell tobacco addiction, characterized by being made up of
  - a tubular body (1) made from a rigid material, preferably plastic,
  - incorporating in its inner area and specifically at one of its ends, a plug (6) located adjacent to a filter (7) having a central hollow space where natural essences (5) are incorporated,
  - arranging a filter (4) on the end adjacent to the end provided with the filter (7), having an extension in the outer area having a smaller diameter and length (2) on which a flexible tip (3) is coupled next to a filter (7), and a secondary filter (4) having an extended inner diameter (2), to which a tip (3) is connected.
